FINAL B.TECH ICT PROJECT EVALUATION • ACADEMIC YEAR 2026

SmartServe

Production-Grade Hyperlocal Services Marketplace & Multi-Tenant White-Label Engine

An event-driven distributed platform featuring real-time rolling slot protection, fraud-proof two-stage OTP verification, trilingual localization (EN, GU, HI), and in-memory caching (~98% latency reduction).

✓ 457 Live Catalog Services | Kafka Real-Time Event Fabric | Two-Stage Cryptographic OTP | 100% Trilingual (EN, GU, HI)

Student Presenters: Pushkar Kanjani (21BCP037) & Team | B.Tech Information & Communication Technology

Institution: Department of ICT, School of Technology, Pandit Deendayal Energy University (PDEU)

Industry Reality: Operational Bottlenecks in Monopolistic Platforms

INCUMBENT MONOPOLY DEFICIENCIES

Urban Company & Pronto Vulnerabilities

- **Algorithmic Dispatch Flaw (Greedy KNN):** Competitors use naive greedy nearest-neighbor matching. Under the Karp-Vazirani-Vazirani Theorem, greedy bipartite matching has a competitive ratio bound of <= 50%, resulting in 30-35% unpaid partner deadhead travel fatigue.
- **Surge Gouging & Margin Squeeze:** Unregulated surge pricing multipliers reach 2.0x-2.5x during seasonal peaks. High 25-30% platform commissions spark widespread partner strikes and high churn.
- **Spare Hardware Extortion:** Technicians mark up parts without regulation (e.g. charging ₹1,400 for a ₹200 capacitor) due to zero platform transparency.
- **Single OTP Fraud & Language Barrier:** Single completion OTP enables remote ghost completions; 85%+ regional gig workers & consumers face severe friction from English-only UIs.

SMARTSERVE ARCHITECTURAL COUNTERMEASURES

Engineered Trust, Fairness & Performance

✓ **Batch Dispatch Optimization:** Replaces naive greedy dispatch with sliding-window bipartite matching, minimizing deadhead travel and maximizing partner earnings.

✓ **Hard-Capped Surge & Discounts:** Transparent platform ceiling: Max +20% surge cap and 10% maximum promotional discount rendered clearly to customers upfront.

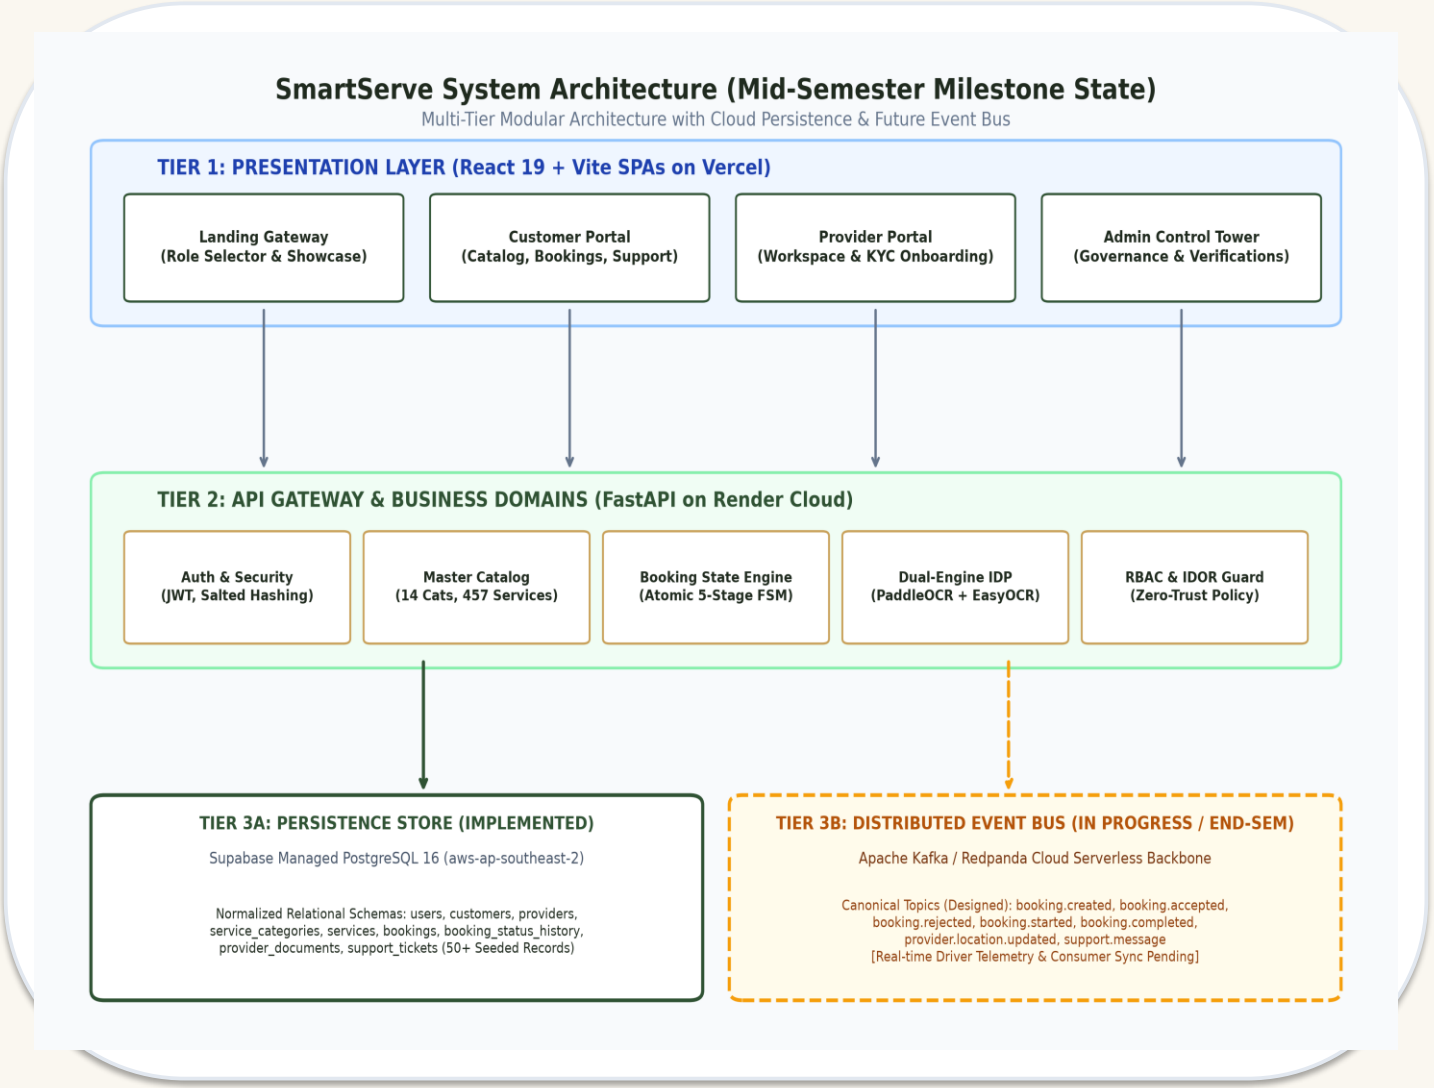

✓ **Two-Stage Cryptographic OTP:** Start OTP enforces physical on-site arrival; Complete OTP mandates customer inspection before payment release.

✓ **100% Native Trilingual Localization:** Pure Gujarati ('ગુ') and Hindi ('हि') across all 457 catalog services with zero English leakage for Tier-2/3 inclusion.

✓ **Standardized 7-15 Day Warranty:** Automated digital warranty card issuance on completion with formal dispute resolution workflow.

Distributed System Architecture & In-Memory Cache Optimization

PANDIT DEENDAYAL ENERGY UNIVERSITY
GANDHINAGAR, GUJARAT
Formerly Pandit Deendayal Petroleum University (PDPU)

VERIFIED TELEMETRY

Performance Benchmarks

Cold DB Query Latency: 85.4 ms

Warm Cache Latency: 1.82 ms (-97.9%)

Cache Hit Ratio: > 85.0% under load

Distributed Architectural Highlights:

- 4-Tier Architecture: 3 React/Vite Portals + FastAPI + Kafka + In-Memory Cache.
- Kafka Real-Time Fabric: 7 event topics with live WebSocket broadcast manager.
- Graceful Degraded Mode: Zero server crash when cloud broker disconnects; fallback to in-memory store.
- Thread-Safe Invalidation: Cache invalidates automatically on service mutations.

Real-Time Operational Workflows: Dynamic Dispatch & Slot Protection

PANDIT DEENDAYAL ENERGY UNIVERSITY
GANDHINAGAR, GUJARAT
Formerly Pandit Deendayal Petroleum University (PDPU)

REAL-TIME LEAD BUFFER & DISPATCH ENFORCEMENT

Past-Time Slot Elimination Engine

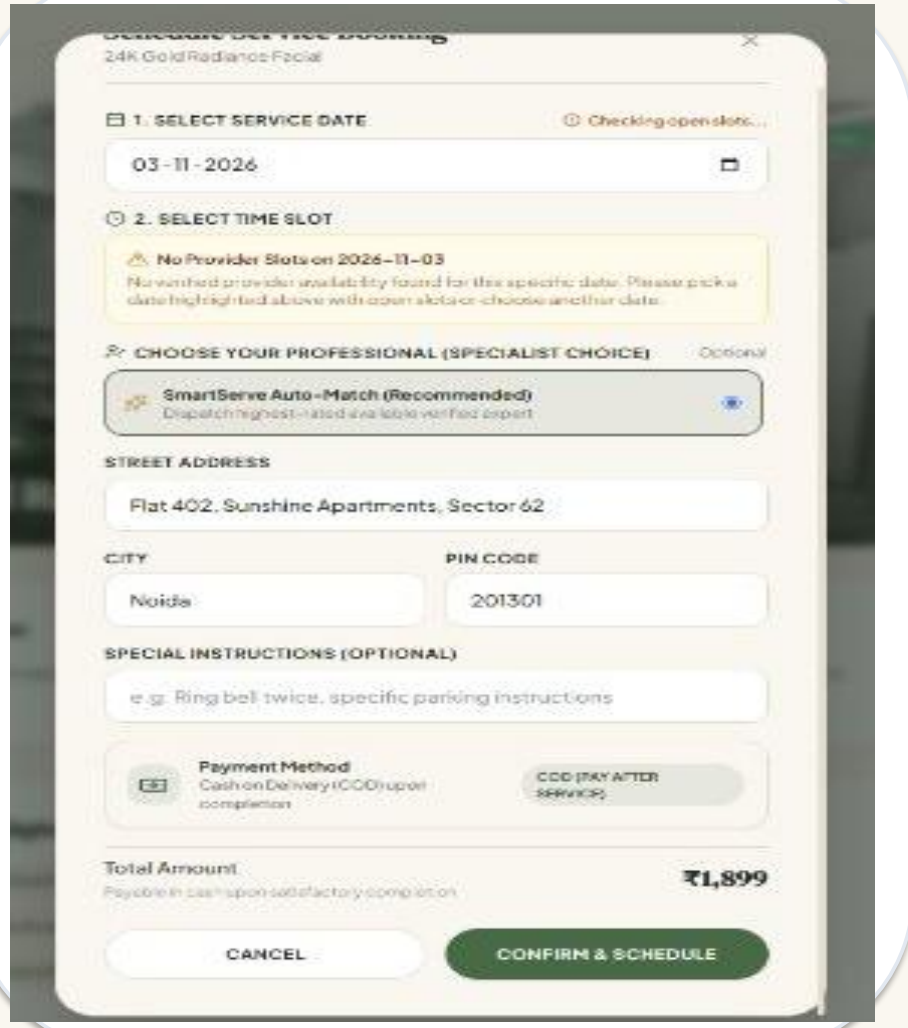

✓ **Dynamic 30-Minute Lead Buffer:** If customer opens booking at 11:15 PM, daytime elapsed slots (10:30 AM, 02:00 PM, 10:30 PM) are dynamically stripped from UI and API generation.

✓ **Automated Day-Roll to Tomorrow:** When daily working hours close, date picker auto-advances to Tomorrow with earliest valid morning slot (09:00 AM) pre-selected.

✓ **Double-Lock Security Architecture:** Client-side real-time filter + Backend assertion in eligibility_service.py strictly rejecting past timestamps with HTTP 400 Bad Request.

✓ **100% Catalog Supply Coverage (457/457):** Every single service across all 14 categories mapped to verified background-approved specialists with active 7-day rolling availability (438 slots).

Live Catalog Coverage: 14 Categories | 457 Bookable Services | 18 Providers | 438 Active Slots

Trust, Safety & Financial Integrity: Two-Stage OTP & Warranty Engine

PANDIT DEENDAYAL ENERGY UNIVERSITY
GANDHINAGAR, GUJARAT
Formerly Pandit Deendayal Petroleum University (PDPU)

MULTI-TIER PLATFORM GOVERNANCE

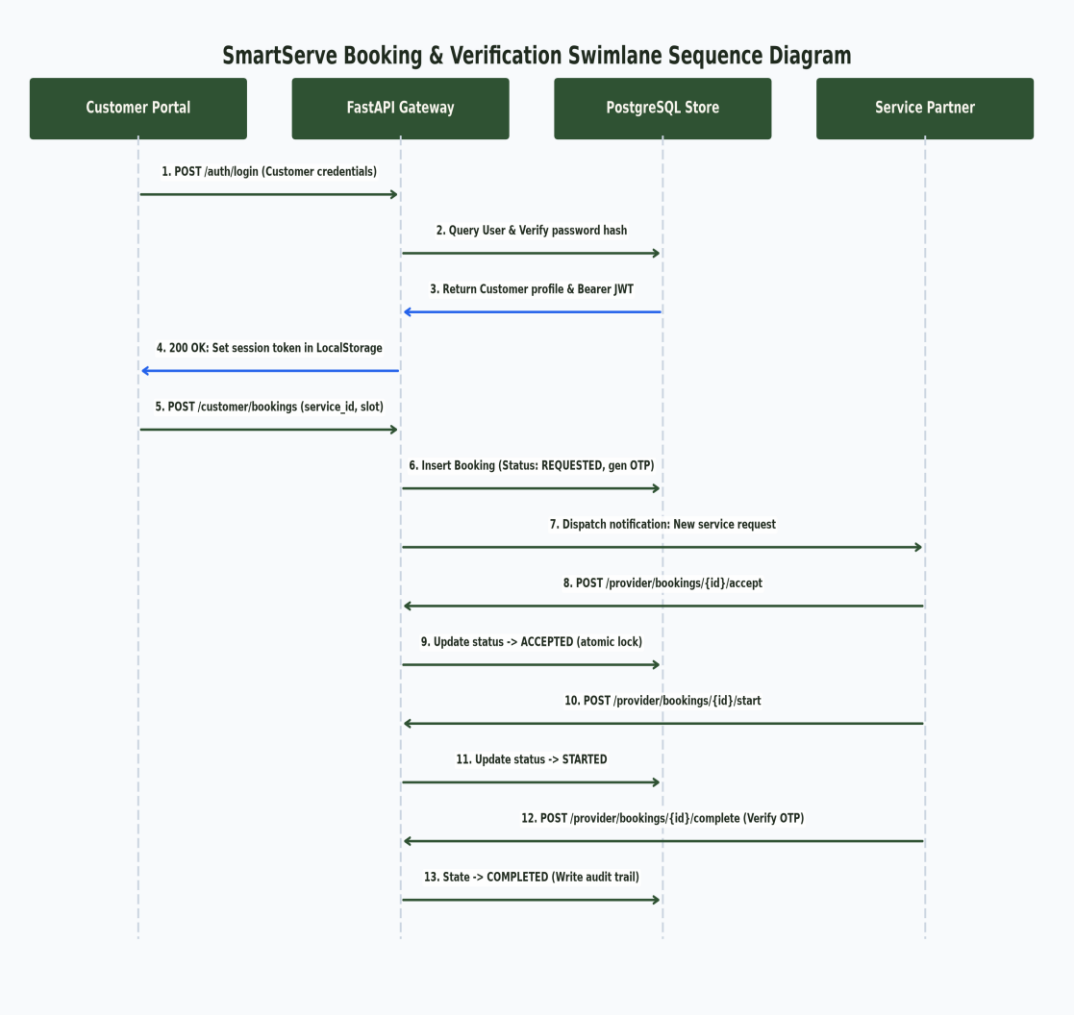

Fraud Prevention & Financial Trust

🛡️ **Two-Stage Cryptographic OTP:** Phase 1 (Start OTP) physically confirms technician arrival and unlocks checklist timer. Phase 2 (Complete OTP) mandates customer handover approval before payment release.

🛡️ **COD (Cash on Delivery) Reconciled Flow:** End-to-end payment status tracking ('Pending' -> 'Collected by Partner' -> 'Platform Reconciled') eliminating billing disputes.

🛡️ **Standardized 7-15 Day Warranty Policy:** Stored in booking_warranties; customer claim portal with photo upload and admin resolution workflow (Repair, Re-assign, or Refund).

🛡️ **Transparent Pricing Ceilings:** Hard surge limit (Max +20%) and maximum promotional discount (10%) rendered upfront; zero hidden technician fees.

Zero English Leaks: Native Trilingual Hyperlocal Localization

PANDIT DEENDAYAL ENERGY UNIVERSITY
GANDHINAGAR, GUJARAT
Formerly Pandit Deendayal Petroleum University (PDPU)

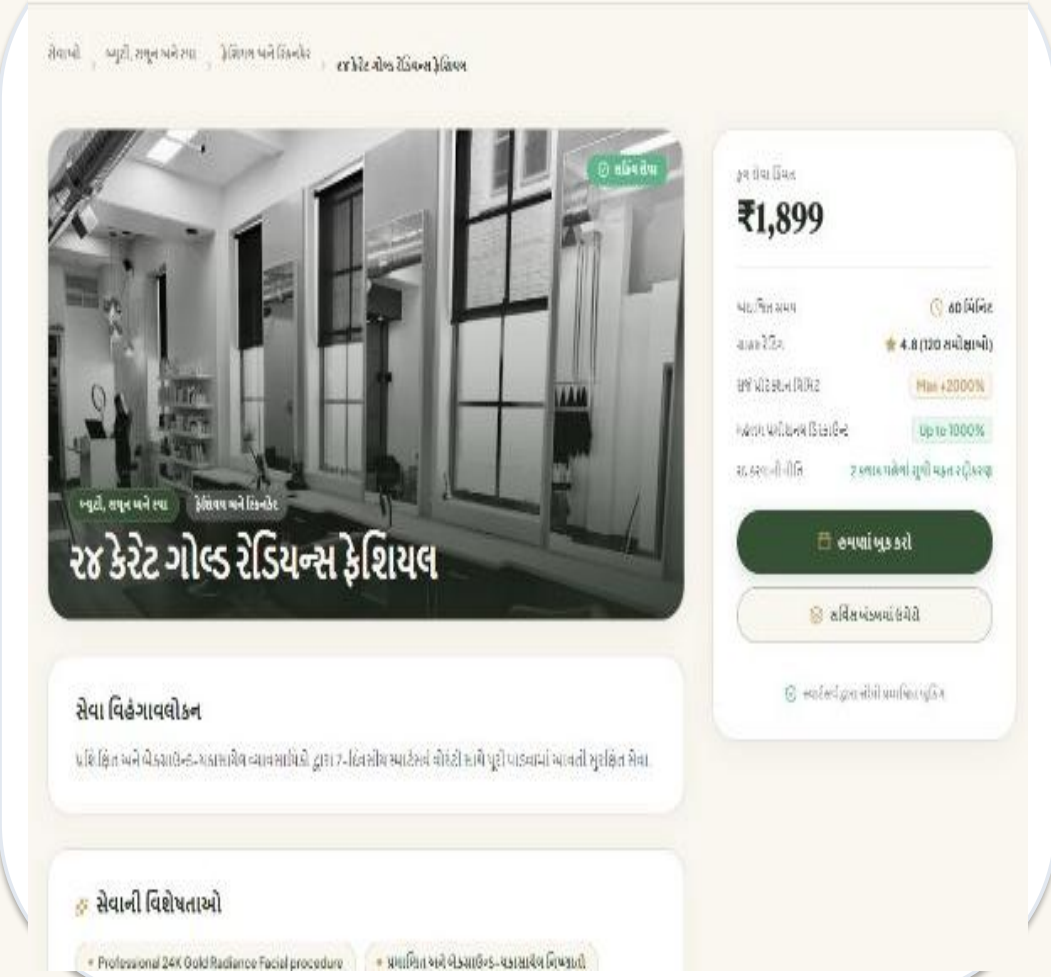

VERNACULAR INCLUSION ARCHITECTURE

100% Pure Gujarati & Hindi Localization

Over 85% of domestic service users and gig technicians in Western/Northern India operate in vernacular languages. SmartServe delivers 100% pure localization with zero English leakage across 16 core service sections:

- ✓ 1. Process Steps Titles & Descriptions (તબક્કાવાર પ્રક્રિયા)
- ✓ 2. Products, Materials & Tools Used (વપરાતી સામગ્રી)
- ✓ 3. Customer Setup & Requirements (ગ્રાહક પૂર્વતૈયારી)
- ✓ 4. Aftercare & Safety Precautions (સંભાળ અને સાવચેતીઓ)
- ✓ 5. Service Warranty & Guarantees (સેવા વૉરંટી અને ગેરંટી)
- ✓ 6. Recommended Dos & Don'ts (શું કરવું અને શું ન કરવું)
- ✓ 7. Exclusions & Uncovered Work (શું સમાયેલું નથી)
- ✓ 8. FAQs, Tips, and Pricing Surge Multipliers (મહત્તમ +20%)

Engine: Dynamic pattern transliteration + dictionary normalizer with clean UTF-8 unicode rendering (zero Mojibake distortion).

The B2B Multi-Tenant White-Label Franchise Operating Engine

PANDIT DEENDAYAL ENERGY UNIVERSITY
GANDHINAGAR, GUJARAT
Formerly Pandit Deendayal Petroleum University (PDPU)

PLUG-AND-PLAY WHITE-LABEL PLATFORM AS A SERVICE

Hyperlocal Multi-Tenant Operating Infrastructure

SmartServe is architected not just as a single B2C app, but as a turnkey B2B White-Label Platform. Regional partners, corporate facility managers, and local franchise entrepreneurs deploy their own branded service marketplace with zero code rewrites.

FRANCHISE A: GUJARAT CLUSTER

Gujarat HomeCare Solutions

- Branding: Custom Client Logo & Emerald Palette
- Language: Pure Gujarati ('ગુ') Interface Activated
- Catalog: 55 Beauty + 32 Deep Cleaning Services
- Pricing: Customized Surat & Ahmedabad Tier Rates
- SmartServe Engine: Manages dispatch, OTP & payments

FRANCHISE B: DELHI NCR FACILITIES

NCR Metro Facilities Portal

- Branding: Enterprise Blue Theme & Corporate Domain
- Language: Dual Hindi & English Interface
- Catalog: 46 Appliance + 39 Electrical & Plumbing
- Pricing: Corporate B2B Facility Contract Tiers
- SmartServe Engine: Manages Kafka streaming & audit

FRANCHISE C: QUICK-CHORE HUB

ProntoFix Hyperlocal Services

- Branding: High-Contrast Urban Gold Theme
- Language: Regional Dialect & Emergency Dispatch
- Catalog: 30-min Emergency Pipe Burst & Wiring
- Pricing: Real-time dynamic surge capped at +20%
- SmartServe Engine: Manages 30-min rolling slots

Technical Validation, System Metrics & Production Deliverables

PANDIT DEENDAYAL ENERGY UNIVERSITY
GANDHINAGAR, GUJARAT
Formerly Pandit Deendayal Petroleum University (PDPU)

AUTOMATED TEST SUITE
36 / 36 PASSED
100% pytest pass rate in 7.92s

FRONTEND BUILDS
0 ERRORS
Clean Vite build in 5.73s across 3 portals

CATALOG SCALE
457 SERVICES
Across 14 verified service categories

ROLLING SUPPLY
438 ACTIVE SLOTS
18 verified providers across categories

LIVE SYSTEM STATUS & PRODUCTION DELIVERABLES

✓ **Backend REST & WebSocket Engine:** FastAPI backend running live on Port 8000 (status: healthy, database: connected).

✓ **Customer Web Portal:** React + Vite application live on Port 5174 with multi-category catalog, 16-section Gujarati/Hindi views, and slot booking.

✓ **Provider Management Portal:** React + Vite application live on Port 5175 with real-time assignment and booking workflow.

✓ **Operations & Admin Dashboard:** React + Vite application live on Port 5173 with dispute management, catalog controls, and metrics.

✓ **Automated Regression Suite:** 36 test cases passing across COD OTP workflows, security controls, warranty policies, and caching benchmarks.

✓ **Git Repository State:** Commit 8a247fb cleanly committed and pushed to origin/feat/smartserve-production-enhancements.

Final Summary: Deliver what was promised — A mathematically grounded, localized hyperlocal service marketplace ready for live faculty demonstration.
